It's no secret that EZ Lock is the top transportation locking system in North America. In fact, it's safe to say that EZ Lock has a 'lock' on the easier and faster solutions people in wheelchairs need to get wherever they'd like to go.

And now, when you order the Motion Concepts new, lower subframe — which provides for specialty modules such as elevate, vent and low profile systems, your whole system is EZ Lock compatible!

How? Well, the compatible EZ Lock kit for the Motion Concepts system is sold and installed through qualified EZ Lock dealers. EZ Lock has tested our new subframe assembly against their comprehensive safety standards and found it meets them all. To order this for your TDX directly from EZ Lock, please refer to part # TDX-MC.

Please contact your Motion Concepts Customer Care Advisor at 1-888-433-6818 toll free for more information on your clients' system compatibility with EZ Lock.

When your clients need an extraordinary power positioning system that's compatible with their EZ Lock transportation system, see why Motion Concepts has a lock on the solutions they need with our new subframe for Invacare's TDX.
